### Answer the following questions:

**1. Why were the Victory Pianos different from previously manufactured pianos?**

- Victory Pianos included two optional bells that could be attached to change how the piano sounded.
- Victory Pianos were the first programmable piano synthesizers used in The Electric Live Orchestra.
- Victory Pianos could withstand the harsh environments that troops in World War II might encounter near the front lines.

**2. Why is Don Lewis considered to be an innovator in music?**

- He invented a euphonium that had two bells, which allowed the performer to change the tone quality of the instrument.
- He combined multiple synthesizers into a single playable setup for the first time in history.
- He was the first person to incorporate live percussion/drumming into a DJ mix.

**3. Innovations in music often lead to less innovation/creativity in the future because people tend to give up when they see other people's creative ideas.**

- True
- False

**4. What was your biggest takeaway from today's class?**
